

How to create ICONex ETH wallet

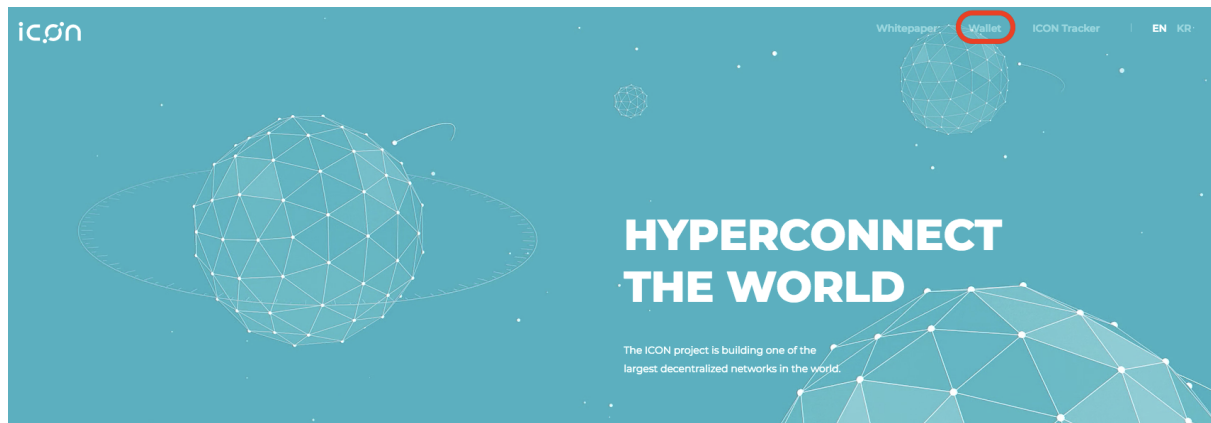

[Create an ICONex ETH wallet]

* The current ICX on the market is ERC20 ICX token. Since ERC20 tokens are ETH based, you need to create an ICONex ETH wallet to store ERC20 ICX tokens.

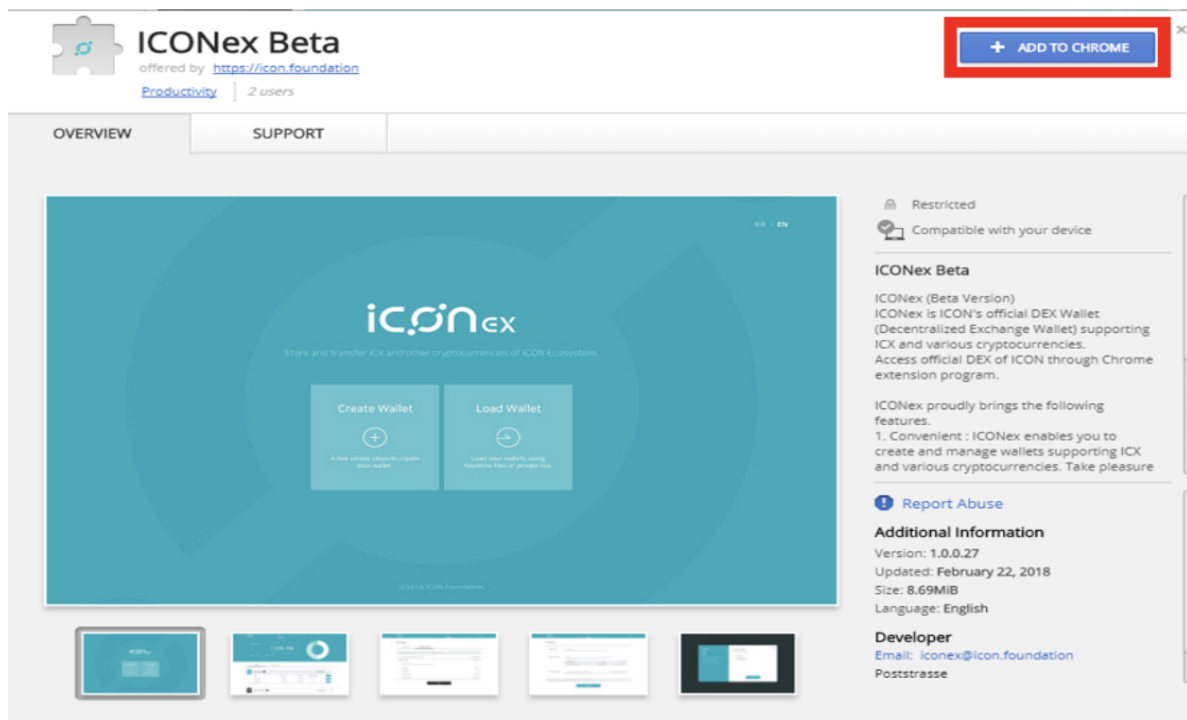

1. Go to our website at <https://icon.foundation> using Chrome browser.

(Download Chrome browser: <https://www.google.com/intl/en/chrome/>)

2. Click "Wallet" link on the top.

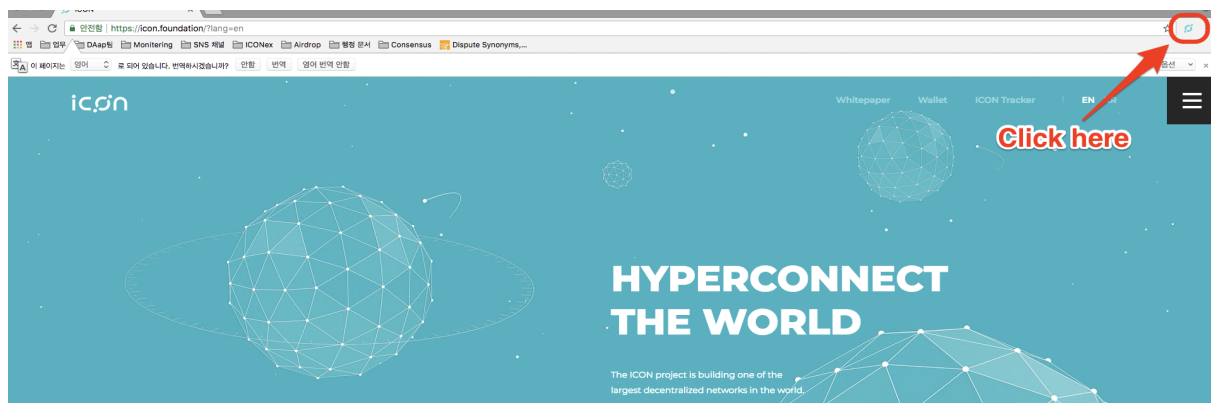

3. Click "+ ADD TO CHROME" button on the upper right corner.

4. Restart Chrome browser.

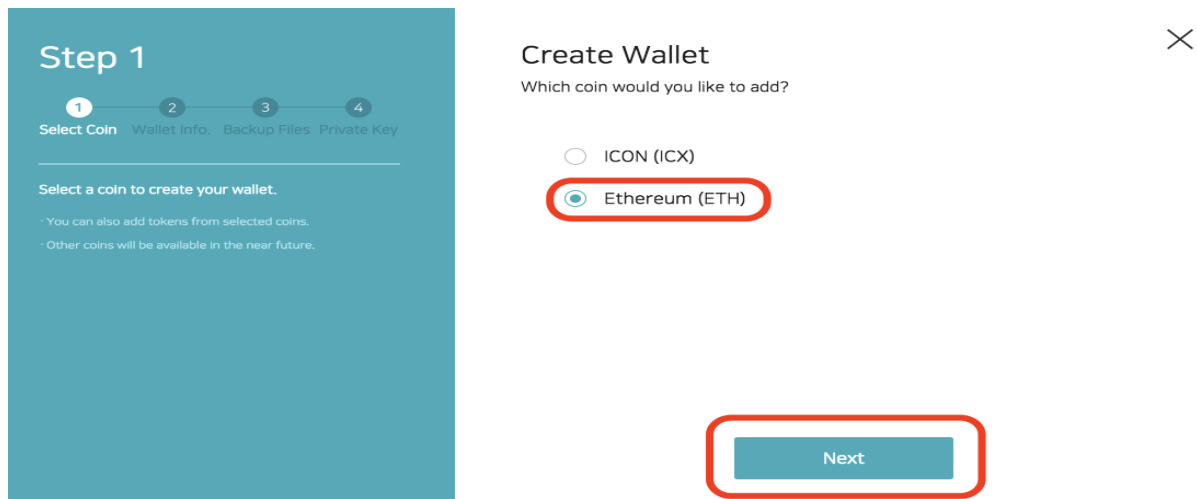

5. Click the ICON Logo to open ICONex wallet.

6. Click "Create Wallet"

7. Create wallet of your choice

Since ERC20 tokens are ETH based, you need to create an ETH wallet to store ICX that is currently on the market. (After finishing the Token Swap process which will be announced later, you can manage Mainnet ICX coins with ICONex ICX wallet.)

8. Enter your wallet name and the wallet password.

Step 2

1

2

3

4

Select Coin Wallet Info Backup Files Private Key

Set a strong and secure password you can remember. You are responsible for safeguarding your password.

DO NOT forget to save this. If you lose your password, you cannot restore it.

- Password is required to transfer assets.
- You will need a password to load your wallet in other devices using Keystore files or private keys.

Create Wallet

Enter a wallet name and password.

Wallet Name

Wallet Password

At least 8 characters including letters, numbers, and special characters

Confirm Password

BackNext

*** The wallet password cannot be restored under any circumstances. Take special care on managing your password.**

9. Download the Keystore file.

Step 3

1

2

3

4

Select Coin Wallet Info Backup Files Private Key

Keystore files are encrypted files of private keys and require a wallet password to access.

- Use Keystore files to load your wallet from other devices or restore your wallet when deleted.
- Keystore files can replace your private keys. Keep your Keystore files safe.
- You can download your Keystore files at the "Wallet backup" menu.

Create Wallet

Pay a special attention to your Keystore files.

Download Keystore file (wallet backup file)

BackNext

*** Wallet backup file contains encrypted private key. This is very important as anyone can access to the wallet with the correct password and the backup file without your permission.**

*** PLEASE MAKE SURE TO STORE THEM SAFELY!!**

10. Copy Private Key or Print Wallet

Step 4

✓

✓

✓

4

Select Coin Wallet Info Backup Files Private Key

Use private keys to load your wallet from other devices or restore your wallet when deleted. You can print or write them down for safe-keeping.

- Pay a special attention to your private keys as anyone holding them can access your wallet.
- You do not have to copy or print right away. Click 'Wallet backup' menu to come back.

Create Wallet

Print your paper wallet or write down your private key.

Private Key

.....

Copy Private Key

Print Wallet

Complete

*** Private keys allow access to the wallets. DO NOT EXPOSE THE PRIVATE KEYS TO OTHERS.**

*** Copy button will enable you to copy and paste your private keys. Print wallet button will print the QR code and the private key of your wallet.**

11. Click "Add Token"
